OUR MISSION

TO PIONEER FASHION-FORWARD PROTECTIVE EYEWEAR FOR LIKE-MINDED INDIVIDUALS

A glance in the rear-view mirror on the way home from work provided the light bulb moment that sparked it all. It was the moment that raised a few simple questions. Surely there are stylish protective eyewear on the market? Surely we can find quality safety glasses out there that aren't disposable? Surely we could ditch these speed dealers forever?

That's the thing: There wasn't, and we couldn't.

From humble beginnings shipping protective eyewear from the bedroom, to the thriving brand we've become today, our mission is clear: To pioneer fashion-forward protective eyewear for like-minded individuals.

A pair that you could wear anywhere, from the worksite to the weekend. To do so not at the expense of Mother Nature, but in harmony with her. To push boundaries, break norms, and enjoy the journey along the way.

While we no longer just create protective eyewear, the premise remains the same. Our purpose is, and always will be, to be at the forefront of protection and fashion.

After all, it's in the name... SafeStyle.

THE SAFESTYLE JOURNEY

SafeStyle® stands as a certified fashion-forward, innovative protective eyewear company marking a revolutionary shift in the industry. The collision of design, safety, sustainability, form and function has redefined the protective eyewear game forever.

Founded by Tim Lewis, a former plumber of 8 years, who was inspired to create SafeStyle after catching a glimpse of himself in the rear-view mirror wearing cheap throwaway safety glasses, this encounter was the spark that started it all.

As SafeStyle evolved, it became clear that individuals and companies alike shared a common dissatisfaction with their safety eyewear. Disposable, undesirable and uncomfortable protective eyewear was soon to be a thing of the past.

Fast forward to now, SafeStyle offers a large range of signature frame designs, colours and lens technology allowing our customers to find their perfect fit, all certified to medium impact AS/NZS 1337.1 protection for confidence in all conditions.

As we continue to move forward, SafeStyle will pioneer, educate, and set new standards in protective eyewear.

The future holds exciting possibilities as we continue our mission to make stylish and certified safety eyewear that will protect you *From the Worksite to the Weekend®*.

SafeStyle®

BRAND DNA

FROM THE WORKSITE.
TO THE WEEKEND.

KEEP SAFE IN STYLE

Our products blend style and protection seamlessly, ensuring you stay safe without compromising on looks.

ENGINEERED TO LAST

Crafted with enduring materials, our products undergo rigorous testing and evaluation.

WORKSITE TO WEEKEND

Products you can wear from the worksite to the weekend, providing unmatched functionality and versatility.

CUSTOMER-LED INNOVATION

We create products for like-minded people, delivering the best solutions for our community of SafeStylers.

SUSTAINABLY-MINDED

Pushing the boundaries with mother nature in mind.

CERTIFICATIONS

All SafeStyle protective eyewear is tested and certified to medium impact protection.

Every frame in the SafeStyle eyewear range has undergone rigorous testing and evaluation to ensure that it meets the safety and performance criteria outlined in the certification standards through SAI Global.

SafeStyle range has been certified to AS/NZS 1337.1: 2010.

This certification signifies that our eyewear is suitable for use in situations where eye protection is required, providing users with confidence that it will effectively safeguard them.

It's an important marker of quality and safety for individuals and organisations seeking appropriate protective gear to protect them from the worksite to the weekend.

SafeStyle are committed to delivering high-quality and trustworthy solutions which is why all our eyewear has been certified with SAI Global.

IMPACT RESISTANCE

Frames and lenses must withstand impacts from a 6mm steel ball at 45m/s.

OPTICAL QUALITY

Frames and lenses must have a high level of optical clarity and minimal distortion to ensure clear vision.

MECHANICAL STRENGTH

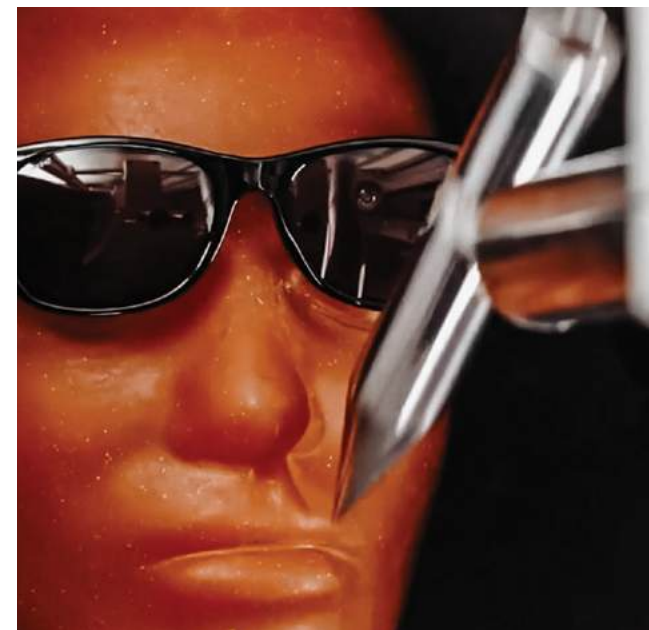

Frames and lenses must be able to withstand impact and stress without breaking.

FIT & COVERAGE

Frames and lenses must fit properly and cover the eyes adequately to provide protection.

DURABILITY

Frames and lenses should be durable enough to maintain their protective qualities over time.

**TESTED AND
APPROVED
TO AUSTRALIAN
STANDARDS**

LOOK FOR THE 5 TICKS

You will know if the product is certified by locating the five tick SAI Global logo found on packaging or certification markings located on the actual product.

LENS TECHNOLOGY

POLARISED UV400 LENS

CUTS GLARE, ENHANCES CONTRAST

Our hugely popular and robust polarised lenses have a dark tint and are perfect for outdoor use by reducing glare from the road, water, snow or any bright light reflective surface. SafeStyle's polarised lenses have an oleophobic coating to eliminate water, oils or fingerprints sticking to the lenses. Perfect for out on the water!

BROWN UV400 LENS

IMPROVES DEPTH PERCEPTION

The brown polarised lens is the next big thing in the SafeStyle range. This is the everyday lens you need in your life offering up natural true colour definition that improves depth perception & excels in low light conditions. SafeStyle's brown polarised lenses have an oleophobic coating to eliminate water, oils or fingerprints sticking to the lenses. Perfect for out on the water!

MIRRORS UV400 LENS

THE POLARISED GAME CHANGERS

Reflective lens safety's? You bet! Our mirror lens technology cuts through glare in a way that exceeds the expectation on being a pair of certified safety glasses. The polarised lens ensures the best protection from harmful UV rays, the waterproof oleophobic coating ensures they stay crystal clear and on top of all that they just look so damn good. Available in both polarised red and polarised blue.

HYBRIDS UV400 LENS

CLEAR INDOORS, TINTED OUTSIDE

The SafeStyle Hybrids Photochromic Lens features our UV-activated, light-adapting lens technology which is perfect for general indoor and moderate outdoor use. With an advanced photochromic lens that offers a seamless user experience, vision remains crystal clear and transparent when you're indoors, and effortlessly transitions to a tinted state when you step outside.

TINTED UV400 LENS

TRUE COLOUR PERCEPTION

The workhorse! SafeStyle tinted lenses are the staple of our outdoor range and are great for general use in a wide variety of outdoor light conditions, protecting your eyes from daily hazards on the job as well as the sun's harmful UV rays. Lightweight and durable, with excellent lens clarity the SafeStyle Tinted range will help you get the job done.

REFLECTORS UV400 LENS

THE DEFINITION OF BIG LENS ENERGY

Introducing the new kid on the block! SafeStyle Reflectors (tinted) are the next evolution of the SafeStyle's one-piece, ultra-wide lens range. Ideal for strong light conditions, these lenses cut through glare and enhance contrast, keeping your vision sharp while protecting your eyes from daily hazards on site as well as the sun's harmful UV rays.

YELLOW UV400 LENS

THE ULTIMATE LOW LIGHT COMPANION

SafeStyle's yellow lenses are the ultimate accessory for working in low-light conditions. By reducing eye strain and increasing contrast in dark environments, reducing headlight glare when driving or operating machinery and improving depth perception these lenses are ideal for night workers or overcast, hazy and foggy conditions.

BLUE LIGHT UV400 LENS

SUPREME RELIEF FROM EYE STRAIN

Our blue light filter lenses are perfect for indoor use for extended exposure to LED, fluorescent lighting and digital screens. Blue light lenses appear very similar to clears but are designed to filter out harmful high-energy blue light frequencies from the visible light spectrum and are specially engineered to filter wavelengths of visible light between 400-440 nm.

CLEAR UV400 LENS

YOUR DAILY DRIVER

SafeStyle's clear lenses are perfect for indoor use and offer 100% consistent optical clarity across the entire lens, giving you as close as possible to your natural vision, protecting you on the worksite and shielding your eyes from the sun's harmful rays.

LENS COATINGS

ANTI-FOG COATING

AVAILABLE ON SELECT SAFESTYLE LENSES.

- **Fog-Free Vision:** The anti-fog coating prevents moisture build-up on the lens surface, ensuring clear vision under varying temperature and humidity conditions.
- **Enhanced Performance:** Reduced fogging means your focus remains uninterrupted and vision unimpeded, leading to improved performance in critical situations.
- **Convenient Clarity:** Lenses stay clear without constant wiping, easing maintenance and enhancing everyday usability.

ANTI-SCRATCH COATING

STANDARD FEATURES ON ALL SAFESTYLE LENSES.

- **Scratch Resistant:** The anti-scratch coating forms a protective layer on the lens surface, enhancing resistance to scratches. This helps maintain lens clarity over time, reducing the impact of everyday wear and tear.
- **Improved Visibility:** Scratches can compromise visibility and cause distortion or blurring. The anti-scratch coating preserves optical quality, ensuring clear and unobstructed sight.
- **Ease of Maintenance:** Lenses with this coating are easier to clean and maintain. The smoother surface resists dirt, debris, and oils, simplifying the cleaning process.

OLEOPHOBIC COATING

STANDARD FEATURES ON ALL SAFESTYLE POLARISED LENSES.

- **Oil Repellent:** Oleophobic coatings resist oil and grease, maintaining a cleaner lens surface and reducing smudges from fingerprints.
- **Enhanced Clarity:** By preventing oil buildup, the coating ensures clearer, more vibrant vision without frequent interruptions for cleaning.
- **Easy Cleaning:** With oils less likely to adhere, lenses are easier to clean, allowing for quicker maintenance and more convenient usage. This can be particularly useful for when you're on the tools sweating or out on the water with sunscreen on.

MATERIALS

POLYCARBONATE

We use polycarbonate in the majority of our lenses and frames. Renowned for its exceptional strength, clarity, and versatility, polycarbonate offers the perfect performance for protective eyewear.

- Shatterproof
- Recyclable through the SafeStyle Recycling Program
- UV 400 Protection
- Durability and Longevity
- Optical Clarity
- Lightweight
- Impact Resistance

TR90

SafeStyle's Phantoms performance eyewear frames are made with TR90, renowned for enhancing flexibility, comfort, and durability, even in demanding sports & outdoor environments.

- Lightweight for extended wear
- Flexible to withstand high-motion activity
- Heat Resistant
- Weather Resistant
- Impact Resistant

NYLON

SafeStyle Sonics use Nylon resin for the frames. Nylon, often utilised in extreme high friction, high stress environments, excels in eyewear offering flexibility and comfort at great value.

- Highly Flexible
- Cost-Effective
- Lightweight
- Comfortable Fit
- Reliable Durability
- Easy Maintenance

EMS GRILAMID® TR XE

SafeStyle's cutting-edge eyewear utilise Grilamid® TR XE, celebrated for exceptional performance and resilience.

- High Flexibility
- Extreme Temperature Resistance
- Lightweight
- Robust Durability
- Chemical Resistance
- Long-lasting Performance
- Made with 51% bio-based material

Black Frame x UV400 Tinted Lens

Classics

THE ORIGINAL DESIGN THAT CHANGED SAFETY EYEWEAR FOREVER.

This is the style that started it all. Classics are straight-up certified protection with a side of attitude. Built tough for the grind, yet clean enough to rock anywhere. A solid fit that provides all-day comfort, with recognisable lines that turn heads. Whether you're cutting material or cutting loose, this is the pair that buried disposable safety glasses for good.

CONVERTS

THE FLAT-FRAME DESIGN THAT LOCKS IN PROTECTION WITH VERSATILE STYLE, KEEPING YOU SAFE IN THE TOUGHEST CONDITIONS.

Built for those who demand comfortable protective eyewear that works as hard as they do. Engineered to adapt to any environment, Converts flat frame design with an interchangeable gasket and optional strap delivers unmatched protection without sacrificing style. Tough enough for the harshest conditions, yet sleek enough to go unnoticed. Converts have you covered.

SWITCHES

THE WRAP-AROUND DESIGN THAT ADAPTS, KEEPING YOU PROTECTED IN THE TOUGHEST CONDITIONS.

Built for those who demand two pairs in one, with both safety glasses and goggle options. The Switches wrap-around design provides complete protection, with interchangeable arms or straps and a removable gasket, making these the most adaptable pair of eyewear you own. Tough enough for the harshest conditions, yet able to switch when the job changes. Switch it up with the Switches.

SKYLINES

THE AVIATOR-STYLE THAT BRINGS OLD-SCHOOL ATTITUDE TO THE HERE AND NOW.

Inspired by the OG aviator era, these frames bring a vintage style to certified protection. Tough, clean, and rebellious, they're made for anyone who lives on their own terms. The double-bridge design commands attention while keeping comfort dialled. Old school spirit with that unmistakable SafeStyle energy.

WORKSITE TO WEEKEND® 30L BACKPACK

The SafeStyle® Worksite to Weekend Backpack 30L is here to take on anything and everything you throw at it. We are bringing in a new era of luggage with a level of innovation and material that no one can match. We have built this backpack from the ground up so it can keep up with the ever-changing landscape, designed with the frequent flyer in mind.

With a clamshell opening for seamless access, numerous pockets to keep your essentials in order and cushioned for maximum comfort, this backpack is ideal for legends on the move. Constructed with premium Cordura 840D Ballistic Nylon, 1800D PU coated exterior, and YKK Zips, the SafeStyle 30L Backpack showcases superior quality and craftsmanship.

WORKSITE TO WEEKEND® 60L DUFFLE BAG

The SafeStyle® Worksite to Weekend Duffel Bag 60L is built for the toughest conditions, the long hauls and the dirty work. Thousands of hours of research, testing, experimenting and optimising have gone into this release resulting in a duffel that is unrivalled in every aspect of design and function.

With 60L of storage, ample compartments and internal straps to secure your contents, this is not just another duffel, it's a statement. Crafted with industry-leading Cordura 840D Ballistic Nylon, 1800D PU coated exterior and YKK Zips, this Duffel exudes undeniable quality & craftsmanship.

DURABLE + FUNCTIONAL **EVERYDAY CARRY**

SafeStyle Hard Case Black

ACCESSORIES

THE SAFESTYLE ACCESSORIES RANGE IS DESIGNED TO KEEP YOUR EYEWEAR PERFORMING AT ITS BEST, FOR LONGER.

Lanyards help secure your pair on your head, hard cases offer protection on the move, and our anti-fog spray keeps your vision clear in hot, humid, or sweaty conditions. Top it off with our lens cleaner that doubles as a frame cleaner to keep your pair looking fresh while preventing damage. This is everything you need to protect your SafeStyles, so they can protect you from the worksite to the weekend.

SUSTAINABLE FUTURE!**

**SCAN HERE TO LEARN MORE ABOUT
THE SAFESTYLE RECYCLING PROGRAM**

ENVIRONMENT

SAFESTYLE AIM TO BE THE LEADING BRAND IN THE PROTECTIVE EYEWEAR INDUSTRY, BUT NOT AT THE EXPENSE OF MOTHER EARTH.

SafeStyle frames and lenses are made of the highest quality materials and as a business the impact on mother nature is always front of mind. Our aim is to reduce the impact on the environment by:

- Reducing the amount of single use plastic protective eyewear you buy (that then heads to landfill) through our design ethos prioritising quality over quantity.
- Consequently SafeStyle products are designed to be reused over and over again.
- Our commitment to the SafeStyle recycling program, available for all brands of protective eyewear.

9x

REDUCE

On average SafeStyles last 9 x longer than other protective eyewear.

67%

REUSE

67% of SafeStyles last a minimum of 3 months to over 1 year.

90%

RECYCLE

Over 90% of SafeStylers surveyed want to recycle their old protective eyewear.

**SafeStyle®
RECYCLING PROGRAM**

**ALL BRANDS OF PROTECTIVE
EYEWEAR ACCEPTED**

SAFESTYLE® IS LOOKING TO LEAD INDUSTRY BY REDUCING THE AMOUNT OF PROTECTIVE EYEWEAR PLASTIC THAT CONTRIBUTES TO LANDFILL. THE ULTIMATE GOAL OF THE SAFESTYLE RECYCLING PROGRAM IS TO RAISE AWARENESS ABOUT WASTE IN CONSTRUCTION BY TAKING DISCARDED PROTECTIVE EYEWEAR AND RETURNING THE MATERIAL TO THE VERY INDUSTRIES THAT IT CAME FROM.

**REPURPOSING LANDFILL
ONE PAIR AT A TIME**

FAQS

DO YOU OFFER WARRANTY?

All SafeStyle non-prescription protective eyewear includes a 30 day warranty as set out by the SafeStyle Wholesale Warranty Policy. Refer to the SafeStyle Manufacturer Warranty Policy 2025 for full Ts and Cs.

CAN THE SIDE SHIELDS BE REMOVED?

No, the side shield is fixed. If the side shield is removed, this will void any safety certifications.

IS THE SIDE SHIELD UV400?*

Yes.

WHAT IS UV400?*

'UV400' refers to UV rays at the top end of the UV spectrum, up to the 400-nanometer wavelength. Meaning the lens and frames are blocking the harmful UV rays and helping reduce the visible signs of aging.

WHAT'S YOUR BIGGEST FRAME?

Our 'Fusions XL' and our 'Primes' are the largest styles we currently offer.

ARE THESE SCRATCH PROOF?

All SafeStyle lenses are coated with our Anti scratch coating to protect it from life's little knocks.

WHAT'S THE DIFFERENCE BETWEEN TESTED AND CERTIFIED?

Tested indicates that the product has undergone various tests to assess its performance and safety features. Certified goes a step further to confirm that the eyewear meets specific standards and provides assurance that the product complies with established safety and performance standards.

WHO IS SAI GLOBAL?

SAI Global is a recognised leading provider of integrated risk management solutions, assurance, and property services.

WHAT DOES BASE CURVE MEAN?

Base curve is the lens curvature around the face and graded lowest to highest. For example a 4 base curve will sit flatter on the face compared to a frame that is 8 base that will curve and wrap around the face.

CAN I SWAP THE LENSES?

We don't sell the lenses separately, if the lens is popped out this will void any safety certifications.

ARE YOUR GLASSES MADE IN AUSTRALIA?

All our glasses are designed in Australia and manufactured in our facility in Taiwan.

HOW DO I CLEAN THE GLASSES?

When cleaning your pair refrain from using products that have any chemicals or are alcohol-based. We always recommend just using warm soapy water. To keep your frames in their best condition we advise customers to use the hard case when not in use, and to clean their frames after pro-longed use of sunscreen, insect repellent or some makeup.

DO YOU OFFER PRESCRIPTION?

Our prescription range is available online or purchased through our SafeStyle optometry stores around Australia.
